Making it Easy to Use Multiple Monitors with Windows™: CineMassive Displays™ Announces the Availability of CineMatrix™

CineMassive Displays™ is Now Including CineMatrix™ with All CineMassive Displays Products

Atlanta, GA – March, 2008 – CineMassive Displays™ is now offering CineMatrix™, a small footprint application exclusive to CineMassive Displays products that makes it easier to use multiple displays with Windows™ XP and Windows™ Vista. With CineMatrix CineMassive Displays customers can easily tile applications and move applications between displays, which saves time and frustration. The program is also now available for free to existing CineMassive Displays customers.

Although using multiple monitors has become more common across a wide variety of computer users, Windows XP and Windows Vista can be difficult to use with multiple displays. CineMatrix, in combination with CineMassive Displays' CineMastery™ software, enhances the Windows interface in order to make it far easier and more intuitive to use multiple displays with Windows.

CineMatrix users can either use a graphical interface or keyboard shortcuts in order to use the program. Features include a mosaic function that tiles all open applications, shortcuts for resizing application windows, and the ability to easily send application windows to different displays on the same system. CineMatrix is available immediately and only available to CineMassive Displays customers. A complete list of CineMatrix features can be found at www.cinemassivedisplays.com/CineMatrix.php

About CineMassive Displays

CineMassive Displays offers professional multiple monitor displays and supporting hardware and software. We are the only company in our industry to offer a 100% compatibility guarantee. All displays come with CineMastery, our exclusive software that enhances Microsoft Windows™ for optimal multiple monitor performance. Our displays also come with ergonomic mounts for maximum convenience and comfort, a premium three year warranty, and a zero dead pixel policy.
